

## ANALYZERS SYSTEMS AND ANALYZER SHELTERS

CBD can provide complete Analyzer systems starting from Feasibility study up to the Turn-key supply including engineering (basic, feed, detail), analyzers, sampling systems, analyser shelters and accessories.

CBD have more than 20 years of internal experience in process analyser systems; this permit to respond to any request of the market; CBD take in charge full responsibility for the correct operation and performance of its supplies. Our goal is to select the best solution for each project according to Customer requirements.

CBD is capable to develop complete sample handling systems design starting from P&ID drafting up to component specifications, assembly and construction.

CBD provides Turn-key supplies including Supply & Design of:

- Prefabricated Analyzer Shelters
- Analyzers
- Sample Conditioning Systems
- Fast loops and pump skids
- Sample Recovery Systems
- Liquid calibration system
- Ancillary Equipment
  - Analyser calibration systems
  - Sample recovery systems
  - Fast loop pumps skids
  - Chilling water systems
  - Whatever necessary to complete a turn-key analyser system supply

CBD can collect data and information from Customers to develop complete study for the specific application. CBD can provide Engineering services as:

- Feasibility study
- Process data Collection
- Measuring Principle Selection
- Supply specification and Material Requisition
- Data Sheets
- Technical Bid Evaluation
- Order follow-up
- Detailed design
